11. Colour photography is undertaken within the technical limitations of the process and certain colours may not necessarily be facsimile over the whole range of colours within a subject. Prints made at different times may be variable in colour balance. Please note that some fabrics such as two-tone taffeta/satin react differently in some lighting conditions and can cause the colour of the dresses to change, giving incorrect colour beyond the photographer's control - it is advisable therefore not to choose this kind of fabric - please discuss with the photographer if you are in any doubt, as she cannot be held responsible for the natural colour deviation which may occur.
